

RHYTMUS

STYLE: VENEER

FEATURES

The "Rhythmus" features a sketch face - horizontal grain on the main body of the door with a 6" vertical portion sketched into the face on the lock stile. Standard in Jatoba (Brazilian Cherry.)

- Rhythmus is the name of a Piet Mondrian painting. The rectilinear designs of these doors and their European heritage combined to suggest naming the models within the collection after Mondrian works of art.
- Vertical grain 6" lock stile, opposing horizontal center veneer.
- All woods are a natural material with varying colors and grain patterns, even in veneers taken from the same tree. The appearance of the finished doors will vary due to these characteristics.
- Laminated Matching Hardwood Edge allows for up to 1/4" additional trim after manufacturing.
- Pair Matching unavailable due to slight variations with inlay width and location.
- Other species are available in the Rhythmus layout - please contact your Lynden Door representative for more information.
- Face Routing and Grooving Available.

Special order contingent on veneer supply - lead time for doors may be up to 8 weeks or more. Contact your Lynden Door distributor to source matching frames and casing.
