

PLAIN SLICED RED OAK

STYLE: VENEER

FEATURES

Plain Sliced Red Oak door skins are pre-graded prior to door construction and final shipment to minimize face defects.

Veneer slicing is done parallel to a line through the center of the log. Cathedral and straight grain patterns result. The individual pieces of veneer are kept in the order they are sliced, permitting a natural grain progression when assembled as a door face.

Plain Sliced Red Oak veneer flitches from Lynden Door are book matched, where every other piece of veneer is turned over so adjacent pages are opened like two adjacent pages in a book. The veneer joints match, creating a mirrored image pattern at the joint line.

Available in standard 6'8", 7'0" and 8'0" passage and bifold sizes, hollow or solid core construction – 1-3/8" and 1-3/4" thick.

Light sanding recommended prior to finishing.

Availability: **IN STOCK**

Contact your Lynden Door distributor to source matching frames and casing.
